3. Flat Roof EasySHED 1.50 x 1.50 x 1.82m
in Slate Grey \$420

Flat Roof Models

EasySHED®

A quality compact garden shed range that offers secure and affordable storage solutions

EasySHED Flat Roof models are the smallest in the range and offer the convenience of ease of transport and handling. These sheds fit comfortably in restricted areas and yards where space is limited.

The compact design means these sheds are easy to assemble and can be moved if required. Flat roof models make ideal garden or storage sheds or a builders' site office. Refer below for a size to suit your requirements.

Code 0100E	1.50m(w) x 0.75m(d) x 1.82m(h)	Zinc \$225	Colorbond \$310
Code 0101E	2.25m(w) x 0.75m(d) x 1.82m(h)	Zinc \$339	Colorbond \$465

EasySHED®

Style & space combine with an innovative
5 Step Assembly sequence for a functional addition

Skillion Roof models offer extra head room at the shed front plus added depth, compared to Flat Roof sheds. This provides additional storage space yet still remain compact enough to fit into small yards.

EdgeSAFE® rolled safety edges are included in all EasySHED models for protection during handling and a lifetime of use. Skillion Roof Sheds make an ideal garden or storage shed or site office. Refer below for sizes.

in Caulfield Green \$1699

StormSHED® Models

StormSHED®

The world's highest rated StormSHED®

StormSHED® models are specially designed and rated at withstanding a wind velocity of 88m/s (316kph). This garden shed range takes toughness in outdoor structures to a whole new level as all modules are manufactured from extra tough sheeting and include all required brackets and anchors. StormSHED® implements EasySHED® renowned 5 step assembly with only one extra step to elevate it to an aggressive, cyclone challenger. This extra step simply involves attaching the innovative, superior, high-strength ribbed cyclone frame to the inside of your StormSHED® which brings it up to the world's highest rated StormSHED®.

These modules are rated to region d category 2 cyclonic conditions and are suitable for cyclone wind zones category C & D. StormSHED® will obtain council approvals in tropical areas like Darwin, Cairns, Broome and high wind areas in other part of Australia. Please refer below to suit your requirements.

EASY 5 STEP ASSEMBLY

EasySHED's greatest advantage over comparable boxed products is our innovative "5 Step Assembly" sequence. The fully illustrated instructions are comprehensive and user friendly.

EasySHED Australian made sheds are engineered for quality, strength and security. A power drill is the only tool required. A correctly assembled and anchored shed will withstand strong winds easily.

EdgeSAFE® FOR EASE OF HANDLING

EasySHED have included the innovative feature of rolled safety edges on all components for quality of finish and ease of handling. *EdgeSAFE*® provides protection during assembly and through a lifetime of use.

EasySHED® **5 Step Assembly**

EdgeSAFE® panels, channel, door jambs and flashing are a standard feature across the entire *EasySHED* product range.

The hi-tensile deep profile ribbed steel shelving used in construction provides an attractive, durable quality for years of performance.

Our coloured sheeting meets Australian Standards (AS/NZS 2728: 1997) and performs in our harsh conditions with a warranty of 10 years in most applications.

AN INSPIRATIONAL COLOUR CHOICE

Our extensive standard colour range is designed to harmonise with period architecture, complement contemporary styles and blend with both town and country.

The Australian landscape has provided the inspiration for the selection of colours which includes the unpainted zinc-aluminium finish.

GUARANTEED FOR QUALITY

EasySHED® and *StormSHED*® are manufactured for quality and strength, and warranted for a period of up to 20 years from the date of purchase.

Retain your proof of purchase to effect your warranty period. Contact the Manufacturer for warranty inclusions.
